SHIFT + LEFT-MOUSE-CLICK on node	Open page/node in left side-bar
LEFT-MOUSE-CLICK + HOLD on node	Slowly zoom into a node
LEFT-MOUSE-CLICK + DRAG	Move Node
SCROLL-UP/DOWN	Zoom out/in

Restoring Athens from a backup

Athens automatically generates backups (`.bkp`) in the same folder. In order to restore any past version of your DB follow these steps:

1. Close Athens

2. Create a copy of your affected Athens folder (your backup)

3. Rename the file `index.transit` in your Athens folder

4. Choose a previous `.bkp` file in your Athens folder that seems to contain the content you hope to recover

5. Rename this `.bkp` to `index.transit`

6. Restart Athens and chose the new `index.transit` file

7. Your database is recovered
