## Graph Visualisation

---

Command	Result
<b>LEFT-MOUSE-CLICK on node</b>	Open page/node
<b>SHIFT + LEFT-MOUSE-CLICK on node</b>	Open page/node in left side-bar
<b>LEFT-MOUSE-CLICK + HOLD on node</b>	Slowly zoom into a node
<b>LEFT-MOUSE-CLICK + DRAG</b>	Move Node
<b>SCROLL-UP/DOWN</b>	Zoom out/in

## Restoring Athens from a backup

---

Athens automatically generates backups (.bkp) in the same folder. In order to restore any past version of your DB follow these steps:

1. Close Athens
2. Create a copy of your affected Athens folder (your backup)
3. Rename the file `index.transit` in your Athens folder
4. Choose a previous .bkp file in your Athens folder that seems to contain the content you hope to recover
5. Rename this .bkp to `index.transit`
6. Restart Athens and chose the new `index.transit` file
7. Your database is recovered
